Year 5 Singing In Church

Year 5 were invited to a singing day just across the road at our very own Christ Church. The acoustics for singing there are amazing and we were very excited about this fantastic inclusive opportunity for our children to nurture a sense of care, respect and empathy towards others. It was designed to help children feel part of something special, enhance their identity and increase their self-confidence and self-esteem. Not only that but singing and listening to music helps children experiment, take risks and be creative.

The day was set up with rehearsal sessions learning 5 pieces of music and song. They learned to manipulate their voices and make new sounds, they explored styles of singing and tested different ways of communicating during these sessions.

After lunch it was performance time. All the children were ready, the recording equipment set up and important members of the music hub invited to listen. All the children sang so beautifully. The harmonies, rounds and sheer joy of their voices was so amazing to listen to. Their cooperation and collaboration with the other children from other local schools was also fantastic. They were a credit to the school. Their singing was amazing.

Year 5 took part in an incredible festival called Healthy4Life at The Parks Sports Centre in North Shields.

There were lots of different events on offer during the day but our activities that the festival chose for us to participate in were cheerleading and rugby before lunch and then hockey and cooking in the afternoon.

The aim of this fun festival was to provide Year 5 children with a variety of activities and wellbeing messages based around physical activity and nutrition. The intention, to develop an enthusiasm and appreciation for different activities, strengthen links between local agencies and schools as well as providing key health and wellbeing messages to all pupils which will help encourage further participation after the event. Which we all agreed after taking part in, we most definitely will try to do.

Year 4

3D Design on Tinkercad

In their Computing lessons, Year 4 have been using Tinkercad to create their own towns. There were some great ideas and fantastic skills being shown.
